

WE MANUFACTURE AND ASSEMBLE MODERN
MAINTENANCE A/B/C/D-CHECK-SYSTEM-UNITS
FOR THE AEROSPACE

The shortest connection between two points is a straight line.

This is mere basics for transporting time-critical freight.

407,552

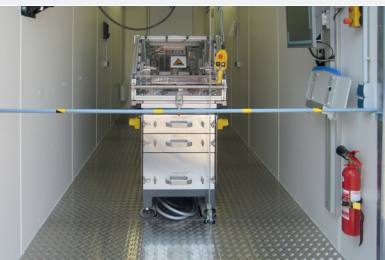

Mobile workshops
for all check-system-units

A complete workshop in a container?

We make it possible!

Since more than 20 years, we provide
our system-units in the turbine industry.

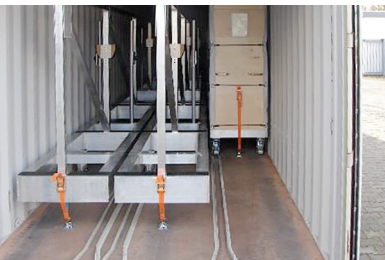

Our system-units (Standard-Sea-
Container) are used internationally,
for mobile maintenance of aircraft,
technical equipment as a repair shop
or parts store.

Workstation
for special customers
with high tech equipment

For the intact arrival:
Each tool can be specifically
be secured

In this 40 feet container
are wing parts for the
Airbus transports

Individual facilities and an abundance of possibilities

Effortless of 8 to 40 feet in length

Up and expansion, as well as facilities of the MRO units

According to your specifications and safety regulations

Expertise through numerous examples of workshop
and tool system-units in use.

Our mobile function rooms offer a variety of useful features in addition:

Climate control /-installations, insulation, second Indoor... and many more special ways.

Integrated electrical systems.

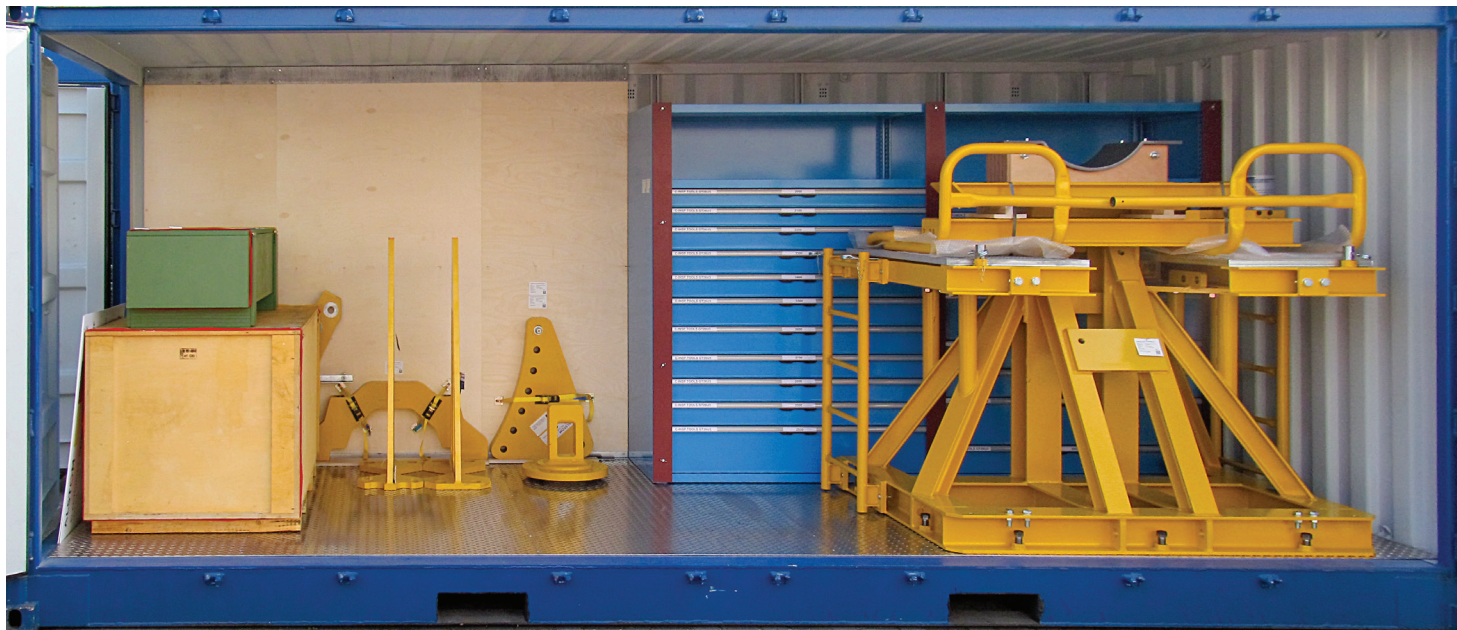

Rails and ramps for the safe loading and unloading harder and more sensitive spare parts.

Global traceability of the container via GPS location in conjunction with RFID BOMs
monitoring camera to monitor the storage and removal of tools and spare parts up to the engine.

Personalized authentication PIN code.

Deliverate Workshop- / Tool-Container

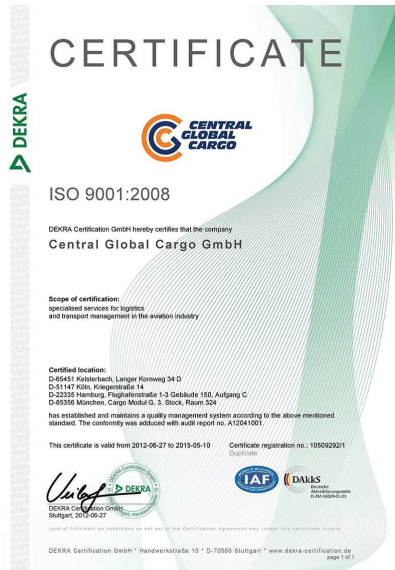

Innovations:

2009 securiumC4: a transport and delivery terminal system with barcode support for time sensitive consignments

2010 flitecubeC4: a safe cost saving transportation system for aircraft engines

2011 consultingC4: a network of specialists offers consulting, training and executive services

2015 airsecureC4: a GPS tracking innovation that offers more transparency and security for air cargo

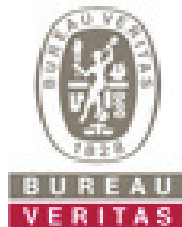

A first-class quality management
is more than important to us.

As a manufacturer and logistic partner of:

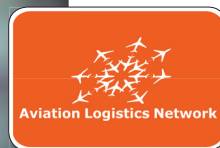

- MRO - line maintenance containers
- Spare parts
- Aircraft parts
- Aircraft parts made of special materials
- high-heat-resistant engine components

We meet the highest standards every day our customers
regarding quality and adherence to delivery dates.

The Aviation Logistic Network
is member of:

AVITATION LOGISTICS
NETWORK Ltd.
